Subject Radon ISL Summary - WORKING DRAFT

Reid, I still haven't had the time I'd like to work on this document, but here is the **working draft**. The radon flux values from evaporation ponds should be fairly well summarized but there is still work to be done on the Pb-210, WL, and operation during sampling sections. Let me know if you have any questions. You should have the referenced documents, if not let me know. The sample calculation (Attachment 1) is forthcoming.

ISL Rn Data - Project Summary, June 2010.doc

I hope you enjoyed the HPS meeting.
